

(a) 3-node line

 $3 \times (0 \rightarrow 2)$
 $T=5, M_v=2, F_{th}=0.80$

(b) 4-node line

 $3 \times (0 \rightarrow 3)$
 $T=6, M_v=3, F_{th}=0.80$

(c) 4-node diamond

 $3 \times (0 \rightarrow 3)$
 $T=5, M_v=2, F_{th}=0.80$

(d) Proposed method versus the exact optimum

(e) Exhaustive-search certificate

Case	Enumerated	Feasible	B&B states	Optimal
3-node line	57	21	11	Yes
4-node line	1,178	272	51	Yes
4-node diamond	114	44	37	Yes

OPT uses no approximation, candidate cap, state cap, or time cutoff.
