

R3: request (2,4) -- numerology selected by the exact optimum and by WPFA

WPFA matches the optimum exactly here: same path, same purification, same fidelity and success probability.

Exact OPT ($\sum\theta=10$)

WPFA ($\sum\theta=10$)

memory cells held $\theta_m(t, v)$:

node capacity 4 per slot; this is one request's own footprint

Method	Path	Purification	Slots	F	w	Pr	$\text{Pr} \cdot w$	$\sum\theta$
Exact OPT	2-3-4	no purification	3-5	0.873072	0.830763	0.898884	0.746759	10
WPFA	2-3-4	no purification	3-5	0.873072	0.830763	0.898884	0.746759	10
